Message from President

President PetroChina International Companies in Indonesia

Dear employees,

In the passing year of 2017, we all work together to make our company growing through change. We change our culture, change our philosophy, change our way of management, as well as change our mission and vision.

We are not the previous PetroChina in Indonesia, we are the new Petrochina in Indonesia....

We are successful to increase our production, reduce our cost, optimize our investment plan, improve the relationships with stakeholders, and contribute more to local communities.

We care more to the environment and our employees.

To achieve more growth, we are preparing the extension proposals of those blocks which are going to expire within 5-6 years. In the same time, we plan to activate some of our sleeping blocks, while eyeing many new opportunities and recommend some of them to the headquarters.

Good results require strategies and cooperation with others. Therefore, we work closely with Pertamina and other oil and gas companies to build stronger and mutually beneficial partnerships in the future.

Year End is a good time for me to thank all of our employees who have worked hard every day, as well as other entities who have supported us.

Finally, Merry Christmas and Happy New Year 2018!

Best regards,

Gong Bencai
President

Letter from Editor

Dear fellow employees,

Year end is approaching. In this time of the year, we look back to good memories we have cherished, impossible things we have pulled off, places we have visited, things we have missed, or beloved people we have lost. We hope each experience give us wisdom and lesson to learn in the future.

In 2017, we celebrated 15 years of successful operation in Indonesia. We aim to be bigger and better in years ahead. For our smooth and successful operation, we owe to the government and the local communities. Therefore, PetroChina is committed to always improve the best social programs in economic empowerment, health and education.

Our compliance to the regulations and commitment to social investment have earned us, for the first time, the Green Proper. It's a start towards more sustainable operations and progressive social programs.

Last but not least, we wish you a merry Christmas and Happy New Year. We continue to look forward to PetroChina employees' best writings and photographs submissions for this magazine.

All the best,
Editorial Team

Interview with Tanjung Jabung Barat
Regent Dr. Safrial

Social Programs is Company's Best Legacy

Interview by Lutfi Rakhmawati
Photos courtesy of Communication Department

As a company that operates in Tanjung Jabung Barat Regency in Jambi, PetroChina always gives back to communities. Through various social investment programs in economic empowerment, education and health, PetroChina works closely with the local administrations to provide better lives for the people. In this edition, we talk to Tanjung Jabung Barat Regent Dr. Safrial to know his ideas of corporate-sponsored social contribution and his vision for the young people in his area.

How do you see the contribution of private companies in the development of your regency?

Development requires supports from all members of society, including private sector. Speaking as the head of regional administration, I see companies like PetroChina as our partner to develop this area. The existence of big companies in this regency creates direct economic impact, including the development of infrastructures and services. But other than building roads and bridges, we also hope that the companies will help us preparing the better live for younger generations.

Why focusing on younger generations?

They will be the ones who continue the development. Young people are creative and so much smarter than my generation. When we were child, our best life scenario was to be civil servant and work for the government. I don't want my kids and their generation to have the same dream. I wish many of them will become entrepreneurs that improve the economy. I also want them to become skilled people, so your company and other big firms can use them to fill high positions. I want the companies operating here use as many local talents as possible. But I also understand that you have tight recruitment standard. So my focus is to create qualified human resources to develop the regency.

What plans do you have for youth development?

You see, Tanjung Jabung Barat has abundant natural resources for many handicraft and coffee business. We have many small-medium enterprises that have potential to enlarge their business outside this regency. But they have yet to have the excellence standard of service. I take one example of our Liberica coffee business. We want this coffee variety to be more popular, we want people to have good experience of sipping this delicious coffee in our hometown. But serving a cup of good quality coffee is difficult. It takes a lot of studies, training and attention to teach someone to serve good coffee. The education must start from the planting process, and continued to post-harvest phase. We want our farmers and young people who have passion in coffee business to know how to roast coffee beans and master the various coffee-serving techniques.

One of PetroChina's social programs is educating the coffee farmers, and we are very grateful for that. We hope you keep educating the small enterprises

communities so they have better business skill. May other companies follow your step.

As we also have big companies in oil and gas sector or plantation, I wish our regency had a vocational school focusing on engineering so we could create skillful human resources. I also see a lot of young people want to work abroad to get more experiences. I fully support that idea, but I want them to be skilled-workers such as nurses or technician. The need for such vocational education is urgent, and I am doing my best to provide it for our younger people.

What kind of supports that you expect from the private sector, especially from PetroChina?

Ideally, the infrastructure development is followed by human resource development. So apart from helping us providing the good living condition, the private sector must invest to people. We appreciate your social programs in construction of schools, mobile library, community health centers and a workshop to showcase our local

products (Gerai UMKM). But we also hope that you will improve the soft skill-related programs such as business workshop, training for teachers and training for farmers.

Investing in people will result in long-term development. And honestly, successful social programs will become the best legacy of PetroChina.

How you reach out to private sectors to make sure they pay attention to social programs?

First thing first, the regional administration must ensure that the companies have smooth and successful business. I understand that bureaucracy and permit matters still become the main challenge for the companies operating in regions. I declare that Tanjung Jabung Barat opens its door for investors from various sectors. We will not complicate your permit and we will support your business, as long as you have commitment to support the development in our area.

CNPC International Seals Agreement with Pertamina

Words by Lutfi Rakhmawati

Photo by Zhao Jianwu

China National Petroleum Corporation (CNPC) International, PetroChina Indonesia's parent company, has sealed an agreement with PT Pertamina (Persero) to collaborate in developing oil and gas working areas in Indonesia and abroad.

CNPC International President Mr Lyu Gongxun and Senior Vice President Upstream Business Development Pertamina Mr Denie Tampubolon signed

the Memorandum of Understanding (MoU) in November in Jakarta. The signing ceremony was witnessed by Upstream Director Pertamina Mr Syamsu Alam and President of PetroChina International Companies in Indonesia Mr Gong Bencai.

The agreement highlighted several points, including the commitment of two corporations to develop the working areas in Indonesia and other countries. Both parties also agreed to seek partnership in oil and gas service sector. Lyu said that CNPC International was also ready to cooperate in downstream sector in the future.

During his visit to Indonesia, Lyu also paid a visit to the office of Minister of Energy and Mineral Resources Ignasius Jonan, SKK Migas Chairman Amien Sunaryadi and Pertamina President Director Elia Massa Manik.

As the production sharing contractor, PetroChina is involved in nine working areas in Indonesia. PetroChina is the operator of Jabung Block and Bangko Block, both are located in Jambi. PetroChina also teams up with Pertamina in Joint-Operating Body (JOB) Pertamina-PetroChina East Java (PPEJ) in Tuban Block in East Java, as well JOB Pertamina-PetroChina Salawati (PPS) in Salawati Island Block in Papua. .

Award & Recognition

PetroChina Jabung Wins Subroto Awards 2017

Words by Lutfi Rakhmawati

Photos by IT Jabung

PetroChina International Jabung Ltd. has won the Subroto Awards 2017 for oil and gas safety category from the Energy and Mineral Resources Ministry.

Energy Minister Mr. Ignasius Jonan presented the award to PetroChina Vice President Human Resources and Relations Mrs Maryke Pulunggono, who received the award on behalf of PetroChina President Mr Gong Bencai, in a ceremony in September.

Just this year, the ministry introduced the Subroto Awards with five categories, each for the HSE for geothermal industry, the energy efficiency, energy journalist's award, oil and gas safety award, and the energy innovation award.

Among 112 oil and gas companies nominated for this award, the Ministry named two upstream oil and gas companies, as well as two downstream companies as the recipients of the awards. The Subroto Award for upstream oil and gas companies were presented to PetroChina Jabung and Pertamina EP Exploration and New Discovery Project, while the two downstream companies were PT Badak NGL and PT Pertamina (Persero) RU VI Balongan.

According to Minister Jonan, the award takes its name from Indonesia's 7th Mining and Energy Minister Subroto, who is regarded as the key figure in developing the energy industry in Indonesia. Subroto served as the minister between 1978 and 1988 and was named as Secretary General of OPEC from 1988 to 1994. Maryke conveyed her gratitude for the award, saying that such recognition

highlighted the company's long-standing commitment for work safety and environment. PetroChina's nomination for the Subroto Award began with the Patra Nirbhaya recognitions from the Ministry. Earlier this year, PetroChina received the Patra Nirbhaya Karya Utama Adi Nugraha III in Exploitation for securing 55,560,252 safe working hours without accident between the period of August 14, 2001 and March 31, 2017. The company also received Patra Nirbhaya Karya Utama in Seismic for securing 7,756,791 safe working hours between May 1, 2009 and March 31, 2017; and Patra Nirbhaya Karya Utama in Drilling for securing 6,712,128 safe working hours between December 15, 2011 and March 31, 2017.

Prior to the safety award from Energy and Mineral Resources Ministry, PetroChina Jabung was also received Zero Accident Award from the Manpower Ministry. This year, PetroChina was awarded for four consecutive terms. The health and safety award is the appreciation for PetroChina's success in recording more than 20 million working hours without accident.

The Zero Accident Award is hosted biennially to praise companies that dutifully follow and apply health and safety measurements in daily operations. Between January 1, 2014, and December 31, 2016, PetroChina Jabung booked >17 million safe working hours in operation and production, as well as >3 million safe working hours in exploration activities. PetroChina received this award in the period of 2008-2010, 2010-2012, 2012-2014, and 2014-2016. In fact, PetroChina had recorded zero accident operation since 2007.

PetroChina's Mobile Library Project Earns CSR Award

Interview by Lutfi Rakhmawati
Photo by Ginandjar

The Mobile Library Project that initiated by PetroChina has won a CSR award from Koran Sindo, one of Indonesia's leading newspapers. PetroChina was one of 26 companies receiving awards during the Appreciation for Innovation Night, held by Koran Sindo and its parent company MNC Group, on August 29, 2017, in Jakarta.

the mobile library for Tanjung Jabung Barat is set to operate next month.

"We try our best to create CSR programs that truly improve the quality of life of people around our working areas. We hope that the mobile library project will help the local governments to grow the love of literacy, especially among young people," Gong said.

The mobile library project was proposed by PetroChina and was fully supported by the regional governments of Tanjung Jabung Timur and Tanjung Jabung Barat. While the company provides the content of mobile library, the government takes care of the day-to-day operation of the library.

"We plan to improve this program by keep improving the book collection," Gong added.

MNC Group President Director Mr. Hary Tanoesoedibjo presented the CSR award for PetroChina President Mr. Gong Bencai. According to Harry, the awards were presented to corporations which performed excellence innovation in various sectors, including technology, service, marketing and social programs (CSR).

PetroChina's mobile library project is a key CSR program in two regencies, namely Tanjung Jabung Barat and Tanjung Jabung Timur in Jambi. As the pilot project, PetroChina prepared two mobile libraries, one for each regency, equipped with computer and internet connection. The mobile library offers flexibility and could reach even remote places to provide books for students and other communities. Currently, the mobile library for Tanjung Jabung Timur has operated regularly, while

The Innovation Awards by Koran Sindo was hosted to celebrate the newspaper's 12th anniversary. A panel of experts, including Koran Sindo editor in chief Pung Purwanto, Senior Lecturer PPM School of Management Wahyu Tri Setyobudi, and Senior Lecturer of Economy Faculty in Universitas Indonesia Budi Frensidy, selected the companies' programs that fit the award's purpose.

Communication and Information Minister Rudiantara, Indonesian Ombudsman Head Amzulian Rifai and Indonesian Military Spokesman Maj. Gen. Wuryanto attended the awarding night. Meanwhile, Gong Bencai was assisted by VP HR and Relations Maryke Pulunggono and Communication Manager Ginandjar.

PetroChina Receives CSR Award from Jambi Governor

Interview by Lutfi Rakhmawati
Photo by IT Jabung

Jambi Administration has awarded PetroChina International Jabung Ltd. for its corporate social responsibility (CSR) programs. Jambi Governor Mr Zumi Zola Zulkifli presented the award to Field Manager Jabung Mr Zhu Fumin in early October.

The awarding ceremony took place on the sidelines of a Coordination Meeting for Governors in Sumatra, which was attended by Home Affairs Minister Tjahjo Kumolo and Public Works and Public Housing Minister Basuki Hadimuljono.

Zumi hoped that the companies operating in Jambi would work closely with his administration to create precise programs that improve the people's lives. "In the future, we hope that the companies' CSR programs will integrate with the government's social programs to improve the development in Jambi," he said.

Zhu stated that PetroChina was ready to increase its CSR commitment for people of Jambi. "This appreciation from the Jambi Administration will encourage us to provide the best programs in various

sectors, including sustainable agriculture, health, economic empowerment and education. We are also grateful that we are fully supported by SKK Migas," he said. SKK Migas Representative for Southern Sumatra Tirat Sambu Ichtijar, who also attended the awarding ceremony, said that CSR must contribute to the regional development. "CSR programs will become the legacies of the companies, a proof that their existence give positive contribution for the societies," he said.

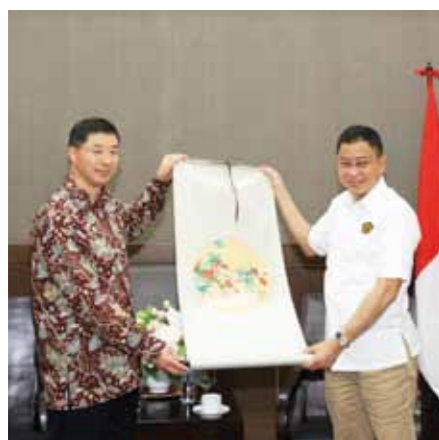

Management News

CNPC Takes Close Look on PetroChina's Operation in Indonesia

Words by Dominica Riyani | Photos by Zhao Jianwu

As a part of the global operations of China National Petroleum Corporation (CNPC), PetroChina International Companies in Indonesia has scored successful achievements. PetroChina started overseas hydrocarbon exploration and development in Indonesia 15 years ago. Today, PetroChina Indonesia is involved in nine working areas across the country.

CNPC Vice President Mr. Yu Baocai visited Jakarta to take a closer look on PetroChina Indonesia's operations in last November.

During his 4-day visit, Mr. Yu attended an internal meeting with PetroChina management to get the thorough and latest

information about the office's performances. PetroChina President Mr. Gong Bencai introduced the company's march "One Company One Dream", which was created to boost the employees' confidence. After the meeting with PetroChina management, Mr. Yu was also updated with other CNPC's network such as Daqing Indonesia, Bohai Drilling, BGP Indonesia and Greatwall.

In his second day of visit, Mr. Yu and the entourage went to Jambi to visit Jabung Block, operated by PetroChina. After having lunch and brief rest in Geragai base camp, they continued the journey by car to Asam Pipih Port for medical passport and safety induction before the trip to floating storage facility FSO by boat. The trip was quite challenging, but Mr. Yu was seen enjoying the trip. Upon returning from FSO, the entourage went on to BGP to have a rest.

Mr. Yu Baocai had breakfast at BGP Camp and continued with road show to BGP Plant, guided by Field Manager Jabung Mr. Zhu Fumin. After that, all delegation flew back to Jakarta and had lunch at "Plataran" Restaurant to enjoy Indonesian food.

Late afternoon of November 16, 2017, Mr. Yu Baocai conducted courtesy visit to Minister of Energy and Mineral Resources Ignasius Jonan to discuss future operation and cooperation in Indonesia.

Farewell dinner was conducted at JIA Restaurant, Shangri-La Hotel before all delegation member flew back to China late evening.

PetroChina Participates in Indonesia-China Energy Forum 2017

Words by Anggi Mahindrasari

Photo courtesy of Ministry of Energy and Mineral Resources

PetroChina International Companies in Indonesia took part in the 5th Indonesia-China Energy Forum 2017, hosted by Ministry of Energy and Mineral Resources (MEMR) of Indonesia and National Energy Administration People's Republic of China (NEA) in Jakarta last September.

The energy forum was attended by representatives from 96 energy-related firms from China and 40 companies from Indonesia. The last event was held in China's Nanning in 2010.

The 5th Indonesia-China Energy Forum was attended by representatives of 96 energy firms from China and 40 firms from Indonesia. The event was aimed at strengthening the two countries'

cooperation in the energy sector and last held in China's Nanning in 2010. PetroChina President Mr. Gong Bencai, assisted by (act) VP SCM Mr. Gusminar, attended the event, along with other Chinese firms SINOPEC and CNOOC.

During the opening remarks, Minister of Energy and Mineral Resources Mr. Ignasius Jonan expressed his appreciation for the cooperation on the basis of mutual benefit principle between Indonesia and China, especially for development of electricity infrastructure in Indonesia. Both countries signed the MoU on energy cooperation. China was represented by NEA Minister Mr. Nur Bekri. Both parties agreed to strengthen cooperation in electricity, mining, oil, gas and services.

Apart from signing the agreement, both countries also established two working groups on oil, gas, and coal, as well as new renewable energy and electricity.

Upstream Director of Directorate General Oil and Gas Mr. Tunggul lead the working group with another speaker from NEA and several Chinese companies. PetroChina, SINOPEC, CNOOC, and CITIC have been investing in Indonesia's oil and gas sector

for years. According to Tunggul, Indonesia's government has improved the regulations to attract more investment in this sector.

PetroChina has praised the government's efforts, and is interested in the newly-introduced Gross split scheme. "We support all government's regulations. We are ready to follow the new policies to develop new working areas offered by the government" Gong said. PetroChina is ready to team up with state-run firm Pertamina and other oil and gas companies.

Recently, PetroChina's parent company China National Petroleum Corporation (CNPC) International sealed an agreement with Pertamina to build partnerships in upstream sector.

Currently, PetroChina operates Jabung Block, partnering with Pertamina Hulu Energi and Petronas, and Bangko Block. PetroChina also teams up with Pertamina in Joint-Operating Body (JOB) Pertamina-PetroChina East Java (PPEJ) in Tuban Block in East Java, as well as JOB Pertamina-PetroChina Salawati (PPS) in Kepala Burung-Salawati Island Block in West Papua.

VP Finance Visits CSR Locations

Words by Bendrifa Brilianti
Photos by Communication Dept.

PetroChina's Vice President Finance Mr Xu Yalin has recently strolled around some locations where the company runs its corporate social responsibility (CSR) programs. As he made way through a coffee plantation and the center of local-made products in late September, he hoped the CSR programs would improve the lives of the local people.

PetroChina's Vice President Finance Mr Xu Yalin has recently strolled around some locations where the company runs its corporate social responsibility (CSR) programs. As he made way through a coffee plantation and the center of local-made products in late September, he hoped the CSR programs would improve the lives of the local people.

Xu was in Sido Muncul Cooperative, belongs to a group of farmers in Tanjung Jabung Barat, to meet with coffee farmers that supported by PetroChina's sustainable agriculture programs. Xu had a chance to know deeper about the making process of famous luwak (civet) coffee in Mr Supadi's workshop. Luwak coffee, which refers to the coffee that includes part-digested coffee cherries eaten and defecated by the Asian palm civet, is known as one of the most expensive coffees in the world.

He also went to Mr Jamaluddin's Liberica coffee plantation and observed the coffee farming process. Liberica is one of the coffee species originated from Africa but grows very well in Jambi land. It has a distinctive flavor compared to Arabica and Robusta, albeit less popular. The Jambi farmers try to introduce this coffee to wider market.

After witnessing the potential of coffee business for Liberica coffee, Xu stated that the company must continue to support the farmers. He hoped that the coffee business would provide better living for the farmers.

To prepare the local products to attract more attention, PetroChina has prepared the center for local-made products, including coffees and handicrafts in Tanjung Jabung Barat.

PetroChina Prepares Business Expansion in 2018

Words by Gusminar
Photo courtesy of Communication Department

The World is changing very fast, driven by advances information and technology. PetroChina Indonesia is ready to move forward next year, even expand the business in 2018.

In 2017, we launched several campaigns aimed at fueling our spirit to be more significant company in Indonesia. The "Focus on Details" campaign, initiated by President Gong Bencai, has resulted in cost-efficient shut-down maintenance in Jabung Block. We will continue promoting this campaign while following up with other ideas that go in line with the company's vision and mission.

PetroChina has set up very high standard and commitment on health, safety, security and environment (HSSE), and this year, we secured Green Proper for our gas operation in Jabung. Our nearest target is to make the Geragai field certified with Green Proper as well. For the next years, we eye Gold Proper for Jabung Block.

As we know, we are involved in nine working areas accross Indonesia, some are approaching their expiration year. Jabung Block has recorded steady production over the years despite the aging oil fields, thanks to our team's hard works and innovative technology. However, to be the top producing oil and gas company in Indonesia, we must have bigger operations.

We are assessing several blocks in Indonesia, setting plans to reactivate our sleeping blocks, and opening wider cooperations with other firms. Just this

year we signed an agreement with Pertamina to develop upstream sector in Indonesia and abroad.

PetroChina Indonesia also eyes other possible opportunities in energy sector in the country. For 15 years of our existence in Indonesia, we only develop the upstream sector. Today, the downstream sector and petrochemical provide huge opportunities too. Our parent company China National Petroleum Corporation (CNPC), with its undisputed experiences and resources, is very keen to take part in enlarging downstream industry in Indonesia. We are also ready to work with other firms, especially state-run Pertamina, to develop the business in downstream. PetroChina always manages close and harmonious relationships with the government, partners and communities living near our working areas. As a part of the society, PetroChina has vowed to provide better living for the local communities where we work. Successful social programs will become our best legacy.

On the other hand, the commitment to enlarge our operations in Indonesia must be followed with a significant reform in business process. We are glad that the government has revised the PTK 007 that becomes our main guidelines in upstream operations. The revision, combined with our company's internal regulation, have streamlined the business process. We can now speed up the business process up to one or two months from previously six months to one year tender process.

Finally, the most important part of the company is its human resources. This year we embraced our company song "One Company One Dream" to boost our our working spirit. Introducing the company's values through culture also becomes the management's new policy. In PetroChina, we work as one family regardless of our differences. With great teamwork, heavy burden is bearable.

Oil & Gas News

Jabung Team Hosts Technical Workshop

Words by Lutfi Rakhmawati
Photos courtesy of Roy Primasatrio

Jabung Field team in October hosted a workshop to strengthen the teamwork and prepare the 2018 programs. General Manager Jabung Mr. Yu Guoyi led the one-day workshop that took place in BGP camp. This was the first technical workshop within years and attended by more than 50 field employees. .

"The workshop is a very good program, we hope to regularly host it at least twice a year," said Yu.

During the workshop, the team evaluated the outcome of 2017 and discussed the 2018 programs. Through the workshop and discussion, the team could effectively communicate the ideas and challenges that PetroChina Jabung faced, Yu added. In 2017, Jabung recorded higher production and performed efficient cost during shut-down maintenance project. "In next year, we have more plans, including in Bangko block. So we must have better preparation," he added. Together with the Jabung team, Yu visited

Gambang and Piano wells in Bangko Block, as well as gas plant in South Jambi "B" Block. They also took times to check the Coffee Farm and Center of Small Medium Enterprises, two of PetroChina's social programs.

Innovation and Efficiency in Water Injection Project of Sukowati Field

Words by Fauzy A. Mayanullah
Photos from various sources

Change the problem to be challenge and opportunity. That is accomplished by the Integrated Team of Joint Operating Body Pertamina-Petrochina East Java (JOB P-PEJ) in Operation Working Area of Tuban Block, especially in Sukowati Field, to save cost and perform efficient operation.

Sukowati field is one of the oil field managed and operated by JOB P-PEJ, which is located in the East side of the capital city of Bojonegoro Regency and it is closely surrounded by the local people community residences. Sukowati reached its crude oil top production between 2010 and 2012, reaching average daily production of 40,000 – 45,000 BOPD. After that, the field has started naturally declining, followed by the increase in water production.

Water injection project was initiated in 2015 to optimize the oil production. This effort, however, met with resistance from the local people living near the facility. The people complained about the smell and gas flaring from the water injection activity and staged a protest to the block operator. The JOB P-PEJ team finally halted the project and discussed to find the best solution. After some trials, the team found

simple innovation on the water injection pump system and water processing facilities, which enabled the water injection activity without flaring and producing smell. The team performed the innovation on Horizontal Pump Skid (HPS) that used for pressing the water into water injection well insomuch neglecting the existence of dissolved gas.

With these system and operation, JOB PPEJ did not require the installation of water processing facilities such as gas boot, tanks, booster pump and additional facilities for gas flaring / vapor such as gas cooler, scrubber, water seal and also KO drum. Beside that, by this innovation, JOB PPEJ also does not have to install the gas compressor to reprocess the dissolved gas flowing into the Central Processing Area (CPA) located in Mudi field in the distance of 10 km away. From this innovation, it is estimated that the cost saving or efficiency resulted from this project could reach of USD\$2 million.

Through this innovation, the JOB P-PEJ team achieved Gold Category in the Continuous Improvement Program (CIP) held by Pertamina Hulu Energi (PHE). The award was presented to each OPCOM of JOB PPEJ, including Mrs. Maryke Pulunggono, representing President Gong Bencai, in August 2017. The CIP is a competition among Pertamina's subsidiaries to boost innovation, improvements and value creation in their daily operation activities, including in safety and engineering.

The JOB P-PEJ team in September visited Jabung Block to share this innovation knowledge to their Jabung counterparts. Actually, water injection in Jabung have been performed since early 2001. However, in this sharing knowledge, the CIP team introduced the simplified process facility system and improvement on the injection pumps done in Sukowati field which result of cost saving, simple production operation and avoid of social impact of surrounding communities.

PetroChina Jabung Shares Successful Technology to other PSCs

Words and photo by I Wayan Suandana

PetroChina Jabung was invited by SKK Migas to share the successful technology applied in Jabung Block to other Production Sharing Contractors (PSCs) in Indonesia on December 13, 2017. The topic was about Thermo Chemical Huff and Puff Technology which successfully implemented in Marmo-1 waxy oil well.

Alfarizky Zanni of PetroChina Jabung's Production Engineering Department presented the result of Thermo Chemical Huff and Puff technology applied at Marmo-1 waxy oil well that resulted production incremental about 450 BOPD for 157 days production. The innovation resulted in oil recovery of 25,000 barrels compared to conventional paraffin solvent treatment, which only maintained Marmo-1 well production for 26 days. By calculating very low operating cost to conduct this job, contractor calculating ROI up to 1,171% for the benefit of the company.

This Thermo Chemical method will be beneficial for other PSCs which have waxy oil wells in the wellbore or event in the surface facility. The component of this product is purely organic system, which is compatible to process directly in the processing facility.

Besides Chemical Huff and Puff Technology the workshop also includes sharing technology about "Bacteria Huff and Puff Technology" and "Nitrogen Huff and Puff Technology" presented by other PSCs.

SKK Migas Operation Deputy Mr. Fatar Yani Abdurrahman encouraged all participant to grab the information during the event and inform each PSC's high level management if any of this sharing session match their well criteria. He hoped that other PSCs would implement this in their respective fields. He also added that during current low oil price, well optimization program is one of low cost program that may bring strong benefit to oil company instead of new development drilling well.

PetroChina Jabung Receives First Green Proper

Words by Lutfi Rakhmawati

Photo Courtesy of Communication Department

PetroChina International Jabung Ltd. (PCJL) has received 2017 Green Proper for its Betara [gas] Field from the Ministry of Environment and Forestry. PetroChina President Mr. Gong Bencai officially received the Green Proper trophy from Minister of Environment and Forestry Mrs. Siti Nurbaya Bakar in Vice President's Office on December 18, 2017. Vice President Jusuf Kalla witnessed the ceremony, as well as handed over the Proper trophy for companies achieving Gold level.

PetroChina was one of 150 companies receiving the Green Proper from the ministry. There were a total of 54 oil and gas companies with Green Proper. Most were Indonesian companies, while only four foreign companies, including PetroChina that awarded with Green Proper. Joint-Operating Body (JOB) Pertamina-PetroChina East Java (PPEJ) that operates Tuban Block in East Java also achieved the Green Proper.

Proper is the environmental rating system, under which companies are assessed for their operational activities, environmental protection and social contribution. The Ministry determines several categories on Proper, starting from black and red for companies that do not comply with safety and environmental preservations. Blue Proper is given to companies with compliance effort on sea pollution, while Green Proper is given for companies with successful effort on waste utilizing and conservation, and community development. The highest level for this recognition is Gold Proper, which focuses on environmental management system.

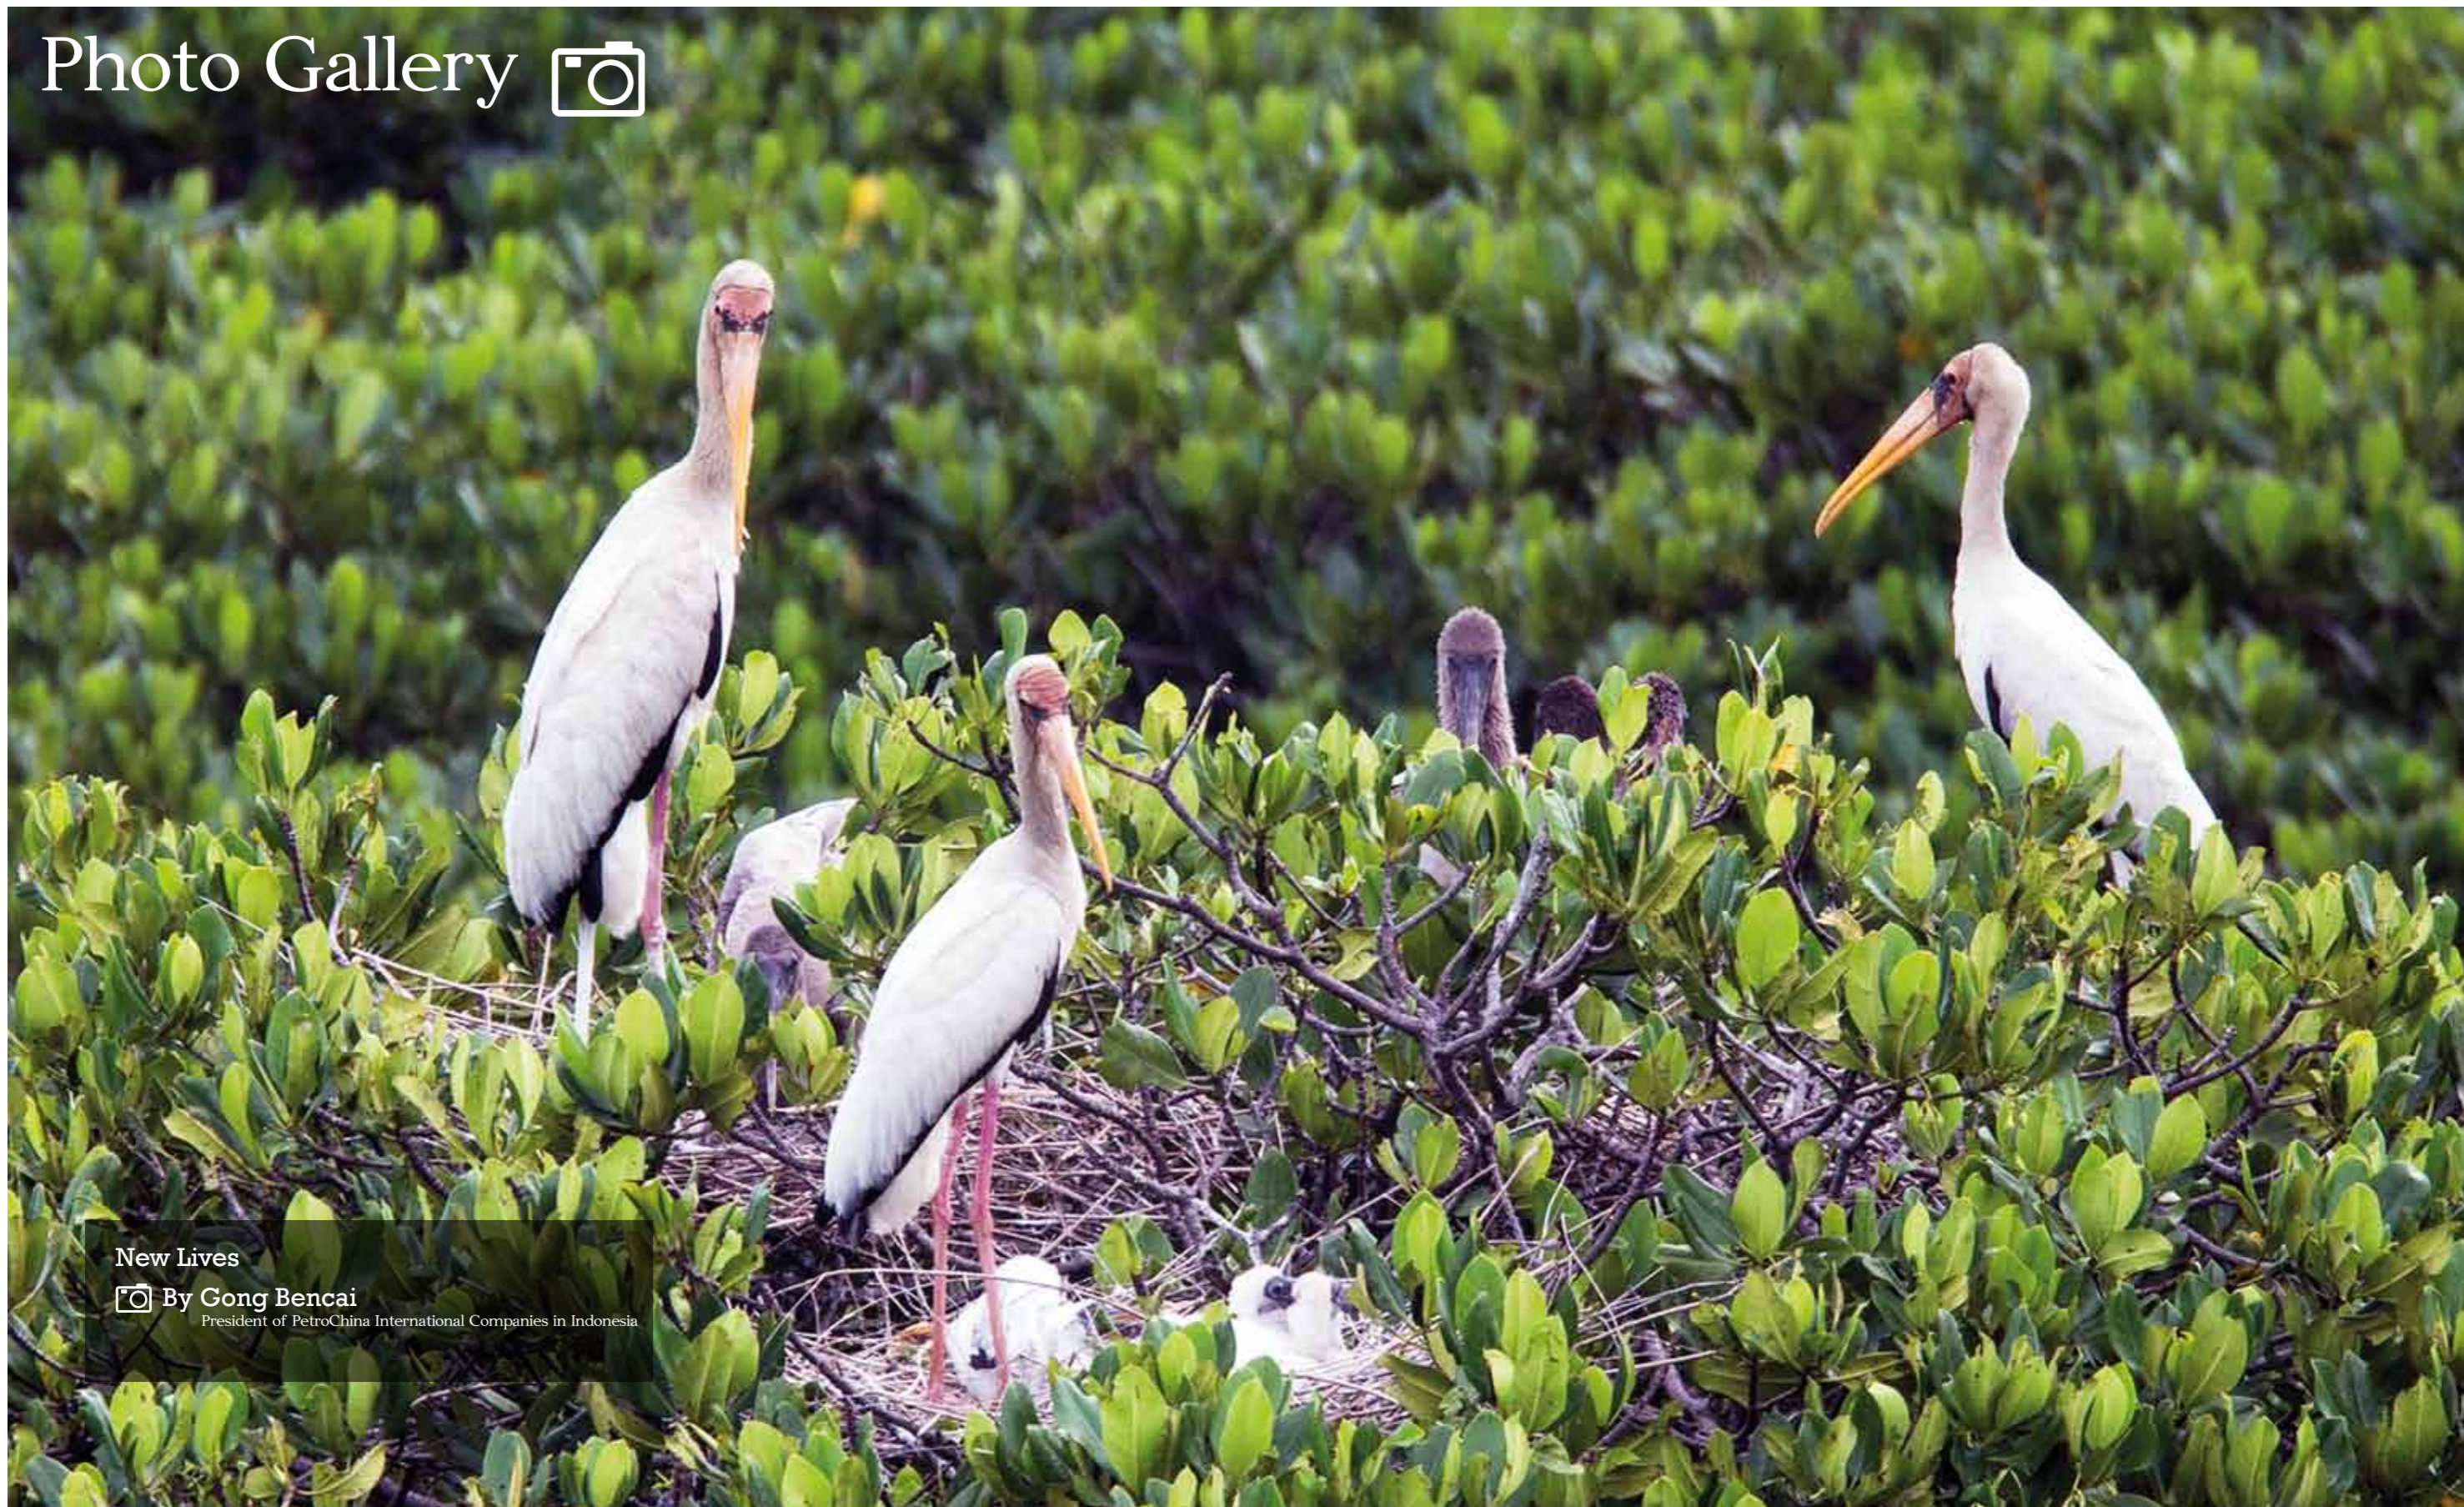

In order to receive the Proper, the companies must be promoted by the Regional Environmental Agency. The evaluator team from the Ministry then conducted document evaluation and field verification to each company. The evaluation covers various aspects, including Energy Efficiency, Emission Reduction, 3R

hazardous Waste, 3R Non-Hazardous Waste, Water Conservation and Water Pollution Load Reduction, Protection and Biodiversity, as well as Social Investment Programs.

"Thank you for all employees for their dedication and hard work in realizing this Green Proper. We are proud of our Green Proper, but we still have a long way to go. Our Geragai [oil] Field must receive at least the same level. And then, we must aim the Gold Proper in the future," said PetroChina President Gong Bencai.

CNPC Management Training Institute Talks Possible Opportunity for Overseas Training

Words by Arya Wirasatya
Photo courtesy of HR Department

A delegation of CNPC Management Training Institute visited PetroChina Indonesia on July 5, 2017, to discuss overseas training for the Indonesian employees. The CNPC delegation consisted of Ms. Li Hui Bo, Mr. San Zhigang, Mr. Wang Xudong and Mr. Wu Yimin. PetroChina President Mr. Gong Bencai, GM Jabung Mr. Yu Guoyi, VP Finance Mr. Xu Yalin, VP Business Ms. Liu Hongna and VP HR and Relations Ms. Maryke Pulunggono welcomed the entourage.

In a meeting with PetroChina's Human Resources Department, CNPC delegates expected to reestablish the Introduction to Chinese Petroleum Industry training for Indonesian employees. The program, formerly known as Cross Culture, has been delayed in the past two years due to oil prices fluctuation.

Maryke hoped that the training would boost the employees' knowledge and potential, which eventually turn them into more capable human capital. Apart from meeting with PetroChina team, the CNPC delegation also paid a courtesy visit to SKK Migas on July 7. Head of Human Resources Division of SKK Migas Mr. Hudi Suryodipuro, Mrs. Dewi Pujiastuti, Mr. George Nicolas, and Mr. Ronnie Kurniawan received the entourage. On this

occasion, the CNPC delegation conducted sharing session to explain more about the CNPC Training Institute and its programs.

Ms. Li hoped that the courtesy visit could establish a good relationship and also create cooperation opportunities in the field of human resource development training for the future.

CSR Updates

PetroChina's CSR Programs: Giving Back to Community

Words by Bendrifa Brilianti and Lutfi Rakhmawati | Photos courtesy of Communication Department

SKK Migas-PetroChina International Jabung Ltd. continues to support the Tanjung Jabung Barat (TJB) administration to live up the potential of its people. On Monday, October 30, 2017, PetroChina handed over its social investment programs in small-medium enterprises (SMEs) empowerment, education and community health.

Vice President of Human Resources and Relations Mrs. Maryke Pulunggono, representing President PetroChina Gong Bencai, handed over the programs of mobile library and construction of school classes and emergency room to TJB Regent Mr. Safrial. PetroChina also handed over the SME's workshop located in Mekar Jaya subdistrict in TJB. The workshop is designed to be the showroom for local-made products, as well as a center for discussion and sharing for SMEs community. Spokesman for SKK Migas Southern Sumatra Branch, Dian Sulistiawan also attended the handover ceremony.

In the SME workshop, Safrial, Maryke and Dian talked to several local entrepreneurs to hear their ideas and insights. Maryke said PetroChina would continue to provide

the best programs that truly brought benefits to the people. "PetroChina has been in Tanjung Jabung land for 15 years. During that time, we continue to work with local governments and community groups to ensure our programs are helpful," she said.

"The goal of PetroChina's social program is to help people achieve their best potential. We focus on education and health issues as a foundation for shaping an advanced society, and empowering the economy so they can enjoy a good life," said Maryke.

In 2017, PetroChina handed over a Mobile Library to TJB people. The library is equipped with a variety of storybooks and book of sciences, portable computers with internet connection, tents and chairs. Many of the books are personal donations from

PetroChina employees. In addition to the Mobile Library program, PetroChina has a "Generasi Cerdas" program in the form of constructing two new classrooms of SMP 4 Satu Atap Pematang Buluh.

PetroChina also established the Emergency Installation (IGD) of Tungkal II Public Health Center this year. This facility can be used for daily health services as well as when disaster strikes.

Through the empowerment program for local business "Jambi Kreatif", PetroChina helped to support the economy of the community to grow. We provide four training and mentoring for local business people.

PetroChina Events

First Townhall Meeting to Mark 15th Anniversary of PetroChina Operation in Indonesia

Words by by Afdal | Photos courtesy of Communication Department

Coincided with the 15th Anniversary of PetroChina's Operation in Indonesia, all managements, Jakarta employees and field employee representatives, have gathered in the first ever PetroChina Indonesia's Townhall Meeting.

PetroChina International Companies in Indonesia held a Townhall Meeting on July 18, 2017. The venue was on Balai Kartini building, which could accommodate more than 500 employees invited to join this grand event.

There were several programs showed in this event. The main program of Townhall Meeting was the management message, presented by President of PetroChina International Companies in Indonesia, Mr. Gong Bencai. Other programs were Service Award, Appreciation Award and Recognition Award Presentations, and of course some entertainments to brighten up the day.

In his message, Mr. Gong Bencai emphasized the need of all PetroChina employees in Indonesia to work as a team, so the company could gain its goal to become number one in this country. President Gong also mentioned the company's strategies to achieve the goal, as well as the need to get fully support by all employees. The President's message was

presented in front of all employees with a title "One Company-One Dream".

Other top management also conveyed their brief speech for the employees, including General Manager Jabung Mr. Yu Guoyi, Vice President Government Relations and Supports Mr. Budi Setiadi, Vice President Human Resources and Relations Mrs. Maryke Pulunggono, Vice President Finance Xu Yalin, and Field Manager Jabung Mr. Zhu Fumin.

Another program during this event was awards presentations. The first was Service Awards presentation, with total 97 employees celebrated their 5, 10, 15, 20, 25 and 30 years of services in January-July 2017. The second awards were given as an appreciation to those who served, and still servicing as Vice President Representative of PetroChina International Companies in Indonesia.

employees, was the Recognition Award. This award was presented for a team within one or more department in PetroChina Indonesia, which has an exceptional performance and contribution to the company. Five teams received the awards, namely: Reservoir Engineering Department, Exploration Department, Audit Team, Tax Team and Jabung Field Team. The awards were presented directly by President of PetroChina International Companies in Indonesia Mr. Gong Bencai and Vice President Human Resources and Relations Mrs. Maryke Pulunggono.

Entertainment performances during this event were included Saman traditional dance, PetroChina's Choir, Maumere traditional dance and three PetroChina's Bands. All performers, including dancers and singers, were PetroChina Indonesia's employees.

PetroChina Hosts Executive Gathering to Celebrate 15th Anniversary

Words by Lutfi Rakhmawati | Photos courtesy of Communication Department

PetroChina International Companies in Indonesia celebrated the successful 15 years of operation in the country this year. The milestone was celebrated on July 19, 2017, by hosting executive gathering in Jakarta.

Vice Minister Energy and Mineral Resources Mr. Archandra Tahar, Vice Chairman of DPR Commission VII Mr. Satya Yudha, Minister Counselor for Economic & Commercial Mr. Wang Liping, SKK Migas Chairman Mr. Amien Sunaryadi, IPA Board Member Sammy Hamzah attended the event, along with PetroChina's partners and other who's who in oil and gas industries.

Among prominent guests were Head of the ministry's human resources development agency (BPSDM) I Gusti Nyoman Wiratmaja (who at that time served as Director General for Oil and Gas), Economic and Commercial Counselor of China Embassy for ASEAN Tan Shufu, Country Chairman of Petronas Indonesia Zaini M.D Noor, President Director of Pertamina EP Nanang Abdul Manaf, Pertamina Upstream Director Syamsu Alam, BP Country Manager Dharmawan Samsu, Total E&P Indonesia President Arividya Noviyanto, BGP President Xu Qingsheng, Genting Oil Executive Director Chia Yu Chau, and many others.

Gong Bencai was aided by other PetroChina Management; General Manager Jabung Yu Guoyi, Vice President Finance Xu Yalin, Vice President Government Relations Budi Setiadi and Vice President Human Resources Maryke Pulunggono.

During this Cocktail Party, PetroChina President Mr. Gong Bencai took the opportunity to express gratitude to the Government of Indonesia, through Ministry of Energy and Mineral Resources, Directorate General of Oil and Gas, and SKK Migas, as well as regional governments and other stakeholders, for their continuous supports during 15 years. "We are also grateful for our strategic partnerships with Pertamina and Petronas, as well as other partners, including Petrogas and Sugih Energy. We are seeking stronger and bigger partnerships in years to come," said Gong.

While being proud of PetroChina's achievements in 15 years, including maintain Jabung's Block production amid aging oil fields, Gong highlighted the company's bigger ambition in Indonesia. PetroChina hopes to increase its production in Indonesia and secures new blocks. "We are ready to seize all opportunities given by the Indonesian Government, be it on upstream or downstream sectors, in onshore or offshore. We also hope to cooperate with other oil and gas firms in developing various working areas in the country," Gong vowed.

Archandra said that the government appreciated PetroChina's presence in Indonesia. "The Indonesian Government

plans to increase our national production; and PetroChina also wants to increase the production, so we have the same objective. We try our best to create business-like approach and create healthy business. We seek to ensure that the government becomes strategic partner to make investors stay. Let's work together," he said.

According to Amien, SKK Migas sees many promising partnerships with PetroChina's parent company CNPC. "Recently, I joined Minister Jonan to a visit to CNPC headquarters in Beijing. CNPC is one of the biggest oil and gas corporations in the world, but PetroChina's business in Indonesia is relatively small. We hope that PetroChina will invest more in Indonesia to drive the economy," he said.

The government also welcomed PetroChina's ambition to step into other sectors, Amien added. "If the business is beyond upstream sector, SKK Migas will help you meet the other related parties. The key is to collaborate with other firms," Amien concluded.

PetroChina's ambition to grow further in Indonesia goes in line with One Belt One Road initiative that launched by the Government of China. With an ambition to create the 21st Century Maritime Silk Road, the China Government is ready to bring sizable amount of investment in countries along the route, including Indonesia.

"We hope our investment in Indonesia could grow more fruitful in the future," said Wang Liping.

Happy Islamic New Year from Geragai Camp

Words by by Afdal | Photos by IT Jabung

The night was young, when thousands of people flocked into Geragai Base Camp. Huge tents were already set, covering the field that supposed to be the tennis court and badminton court within the camp. Another additional tent was set on the grass field, right on the back of those courts. That night, Geragai Base Camp was welcoming thousands of people to celebrate Islamic New Year, 1439 H.

It is the only night within a year, when PetroChina Jabung openly invites local community to come to Geragai Base Camp. But far from being a host to a party, or fireworks event, the celebration of Islamic New Year is always filled with religious preach. This year, PetroChina invited Ustad H. Ahmad Taufik Hasnuri, a well known preacher from Palembang, South Sumatera.

The event was opened by citation of Holy Quran and welcoming speech by Head of Badan Dakwah Islam (BDI) of PetroChina Jabung, Mr. Zaenudin and Field Manager of PetroChina Jabung, Mr. Zhu Fumin. On this occasion, Mr. Zhu Fumin, welcomed the entire guest to Geragai Camp and delivered the happy New Year remark on behalf of Management of PetroChina Jabung.

The Islamic New Year event at Geragai Camp was celebrated on Saturday night, 23 September 2017, roughly two days after the actual day of 1 Muharram, the first month of Islamic Calendar. The first Islamic Year begins in 622 AD, marked by the event of great emigration of Prophet Muhammad and His loyal followers from the Holy City of Mecca to Medina. The event is known as Hijra.

Main differences in the calculation of Islamic Calendar, with the Gregorian Calendar, is that Islamic Calendar is based on the lunar movement, instead of solar movement. Although the number months is also 12, but number of days within a year is 11 or 12 days shorter than the Gregorian year. All religious duties, such as pray, fast and pilgrimage, as well as determination of holy dates or festivals, are calculated by this calendar.

The lesson of Hijra was brought by Ustad H. Ahmad Taufik Hasnuri during his

preaches on Geragai Base Camp. "We must use this moment of new year celebration to contemplate ourselves for the last 12 months. There are only two things that matter, we must hijra (swift) from our bad behavior into good behavior and from good behavior into better behavior," he said.

Ustad Ahmad himself is quite a prominent preacher in South Sumatra. His in depth explanation about the wisdom of celebrating Islamic New Year, was interlude by many intermezzos and humors that made all the audience glued to their chair for about two hours. "When I received a request to fill in a session in Jambi, I immediately agreed to it. Because I know that we speak the same local language," he explained.

Among the invited guests for the Islamic New Year Celebration were local government officials and village authorities. Assistant III of Tanjung Jabung Timur, Mr. Umar Mahmud, was attended the event to represent the Regent of Tanjung Jabung Timur. On his remarks, Mr. Umar Mahmud stated his appreciation and gratitude to PetroChina Jabung to host this event. He hoped that this good tradition of celebrating Islamic New Year will continue in the years to come. It was the fifth celebration of Islamic New Year in Geragai, Happy New Year.

PetroChina Workers' Union Celebrates Youth Day

Words by Lutfi Rakhmawati | Photos courtesy of PetroChina's Workers Union

PetroChina Workers' Union and more than 350 employees commemorate the Youth Pledge Day by hosting a sport even on Saturday, October 28, 2017 in Jakarta Office.

The PetroChina Fun Walk 2017 also celebrated the workers' union anniversary. The participants, including PetroChina President Gong Bencai, Vice President Finance Xu Yalin, Vice President Human Resources and Relations Maryke Pulunggono and former Vice President Representative Susana Kurniasih, took 6-kilometer walk around Rasuna Said street in South Jakarta. There were 19 teams participated in the event.

After the walk, all participants went to gathering session with various games. In between meals and informal session, PetroChina bands performed some songs. As appreciations to the funwalk participants, the Workers' Union provided many door prizes, including a motorcycle, a bicycle, a refrigerator, kitchen appliances and other gifts.

Speaking in front of all participants, Workers' Union Chief Andri Syafriya said that Youth Pledge Commemoration was a reminder for Indonesian's young communities to participate in building the country. "As we are working for an oil and gas company, we must do our best to help developing the energy industry in Indonesia," he said.

The Youth Pledge was declared by members of Second Youth Congress on October 28, 1928. The congress' participants had diverse background and ethnicities but had one goal in common, which was the independence of Indonesia. They proclaimed three ideals; one motherland, one nation and Indonesian language to unite them.

PetroChina Hosts Gathering for Chinese Business Community

Words by Lutfi Rakhmawati | Photos by Zhao Jianwu

PetroChina International Companies in Indonesia has invited members of China Chamber of Commerce in Indonesia in a gathering on Saturday, October 29, 2017.

The gathering started with a 6-kilometer fun walk around JL H.R. Rasuna Said thoroughfare near PetroChina's office in South Jakarta. The event was followed by informal gathering session in PetroChina's office.

Among the prominent guests in the event was Mr. Wang Liping, Counselor of Economic and Commercial Counsellor's Office of Embassy of China in Indonesia. More than 130 people from 38 companies also joined this event. PetroChina management, including President Mr. Gong Bencai, General Manager Jabung Mr. Yu Guoyi, Vice President Finance Mr. Xu Yalin, Vice President Human Resources and Relations Mrs. Maryke Pulunggono and Act. Vice President Government Relations and Supports Mr. Gusminar welcomed the guests in this occasion.

After finishing the walk, the participants were welcomed by PetroChina's Saman

Dance performance, followed by PetroChina's choir that presented the company's song "One Company One Dream", and PetroChina band.

"Today, we got the chance to introduce our company. This event is a very important for us, as we want to communicate with the Chinese business people here. Also, through this event we can gather many new friends and build a good relationship," Gong said.

Leaving Expats Share Memorable Stories in Indonesia

Words by Lutfi Rakhmawati | Photos by Djamaludin

PetroChina Indonesia in December hosted a farewell gathering for four leaving expatriates who were set to return to Beijing for good. The four leaving expatriates are VP Operation Mr. Wang Wuhe, Gas Crude Oil Planning Manager Mr. Han Xiaolin, G&G Specialist Mr. Yang Fuzhong, and Engineering Dept. Manager in Petroselat Mr. Wang Xinming. Previously, we also held a farewell event for Exploration System Support Manager Mr. Zhang Chunlei.

The informal event filled with laughter and good stories was attended by PetroChina management, managers and dozens of staff of the company. Each expatriate was given an opportunity to share their memorable stories while working in Indonesia, as well as to convey their farewell message to other employees.

PetroChina President Mr. Gong Bencai jokingly said that other Chinese expatriates made more friends than he did. "Compared to me, other expatriates spend more times with other staff. Mr. Han Xiaolin, for example, has more Indonesian friends and does many activities with them. I am glad that they work hard but make friends too," he said.

Mr. Han Xiaolin, who previously worked in Africa, said that Indonesia and its people were special. "Here, not only do I have work colleagues, I also have friends to spend time with.

We do basketball with PetroChina's basketball team, have lunch or dinner together," Han said.

Han highlighted the support from the PetroChina management as the key of his career in Indonesia. Mr. Wang Wuhe seemed to agree with that. "Speaking from operational point of view, we are successful. We have recorded zero accident and zero fire incidents, among other things. This is not an easy achievement for an oil and gas company, and I want to thank my team for that," he said.

Mr. Yang Fuzhong recalled his first day working in Indonesia. "It was four years ago, but it felt just like yesterday. I am fully supported by other staff all these times, and I am grateful for that. Now that I am leaving, I will remember wonderful memories of working for PetroChina Indonesia," Yang said.

Mr. Wang Xinming, who had worked in various countries, said that he learnt a lot of things in Indonesia. "PetroChina has valuable company culture. I have never worked in a company that has a dedicated song for the employees," said Wang. "I thank everyone who has supported me. I hope PetroChina Indonesia will be more successful in the future," he added.

Gong hoped that all the leaving expatriates will keep good relations with the Indonesian team. "Even if you are no longer here, please remember our office, our culture, our team, and our company's spirit just like in our song One Company One Dream," he said.

PetroChina's Partners & Stakeholders

Indonesian Govt Talks Future Partnership with CNPC

Words by Dominica Riyani, Gusminar and Lutfi Rakhmawati | Photos courtesy of Communication Department

Indonesia's Energy and Mineral Resources Minister Ignasius Jonan, as well as chairman of upstream oil and gas regulator SKK Migas Amien Sunaryadi in June visited state-owned China National Petroleum Corporation (CNPC) to talk about future partnership.

The bilateral cooperation between two countries in energy sector is one of the key agendas following the Belt and Road Initiative that launched by the China Government in May this year. During the event that attended by President Joko Widodo, the China Government aimed at recreating the modern silkroad to strengthen the economy around the region.

While attending the Eighth Clean Energy Ministerial (CEM8) event in Beijing, Minister Jonan visited China's giant energy companies, including CNPC, to follow up the Belt and Road Initiative. President of PetroChina Company Limited Mr. Wang Dongjin welcomed the Minister and SKK Migas chairman in his office on June 6, 2017. Minister Jonan offered some opportunities for CNPC to expand its business in Indonesia.

On June 8, Amien and his team visited CNPC's Dalian Petrochemical Company. As the biggest oil and gas firm in China, CNPC has global experiences in various business platforms, including petrochemical. Indonesia, on the other hand, still has very promising potential for petrochemical market.

Indonesia is also facing a challenge of mature oil fields in various working areas throughout the country. To learn more about the Enhanced Oil Recovery (EOR), Amien and his team visited CNPC's Research Institute of Petroleum Exploration and Development. China's EOR technology is among the most advanced in the world.

PetroChina Management Talks to Employees ahead of Tuban Block Extension

Words by Adderio Ryan | Photo courtesy of HR Department

PetroChina management has visited Tuban Block and met its employees stationed in the block to gather aspiration ahead of the block's expiration in February 2018.

The management, represented by VP Human Resources and Relations Maryke Pulunggono and HR Manager Dencio Renato Boele, talked to more than 100 PetroChina employees in Tuban Block on Friday, August 25, 2017.

PetroChina has a total of 148 employees seconded in Joint Operating Body (JOB) Pertamina-PetroChina East Java (P-PEJ), which operates Tuban Block in East Java. As the block is approaching its end of contract, PetroChina management and employees discussed several issues related to manpower, including about job security in the future.

During the discussion, the employees expressed their willingness to continue working with PetroChina in the future.

PetroChina currently operates Jabung Block and Bangko Block, both in Jambi, and Madura Block in East Java. The company also teams up with Pertamina in JOB P-PEJ in Tuban, East Java, as well as JOB Pertamina-PetroChina Salawati (P-PS) in Sorong, West Papua.

SKK Migas, PetroChina and Pertamina Visit RIPED and Jilin Oil Field

Words by Lutfi Rakhmawati, Roy Primasatria, Wicaksono | Photos by Roy Primasatria

A team of SKK Migas, PetroChina International Jabung Ltd. and Pertamina visited China National Petroleum Corporation's (CNPC) research center and one of its oil fields in China in late October to learn more about the latest technology in upstream sector.

The SKK Migas delegation comprised of seven persons, including Deputy of Planning Mr. Jaffee Arizon Suardin, Head of Production and Operation Division Mr. Ngatijan, and Head of Field Development and Technology Division Mr. Benny Lubiantara. PetroChina team comprised of

General Manager Jabung Mr. Yu Guoyi, Sr. Development Manager Mr. Budi Tyas Utomo and Exploitation Manager Ms. Li Danmei, as well as technical team members Wicaksono, Roy Primasatria and Widhijoko.

The Pertamina team was represented by VP Upstream Technology Centre Ms. Sri Budiyan, VP Research Technology Center Sigit Rahardjo, Chief Engineer of Reservoir and Production Ms. Eti Suryati, and Reservoir Engineer Pertamina EP Mr. Setia Bungsu Komarudin.

The entourage spent three days in Research Institute of Petroleum Exploration & Development (RIPED), belongs to CNPC (the parent company of PetroChina), to learn more about the Enhanced Oil Recovery (EOR). They also took three-day visit to Jilin Oil Field, located in northeastern part of China, to gain knowledge on CO₂ injection technology.

During the visit in Jilin, the delegation learned and discussed the success story of Jilin Oil Field in implementing CO₂ injection technology to boost its

production. PetroChina and Pertamina have planned to implement this technology in near future.

Indonesian Government has a plan (strategy) to keep and increase oil and gas production in Indonesia called Indonesian's President Action Plan. One of the strategies is through enhanced oil recovery (EOR) program that is planning to do as soon as possible. To support this Indonesian Government Program through SKK Migas, PetroChina Jabung has an intensified efforts maximize production through the optimization of old aging wells through enhanced oil recovery (EOR), which involves various techniques to augment the enhanced oil recovery. PCJL currently considers a small-scale alternative to CO₂ flooding processes by implementing the CO₂ Huff-n-Puff process.

As national oil companies in each country, both PetroChina and Pertamina have built strong partnerships in Indonesia. Both companies are partners in Jabung Block in Jambi, and team up to manage the Tuban Block in East Java, as well as Kepala Burung-Salawati Island Block in West Papua.

PetroChina Choir Introduces Company's Identity through Beautiful Voices

Words by Adrian Wibisono and Yudha Ramadhona | Photos courtesy of Communication Department

Culture is an important part of PetroChina Indonesia's new corporate identity, with music as the best way to introduce it. Acting as the ambassador of PetroChina is the Choir Group, which was founded just this year but already performed in several occasions.

The group was formed to introduce the new PetroChina's company song "One Company One Dream". The idea of company's song, aimed at boosting employee's spirit and confidence, came from none other than PetroChina President Mr. Gong Bencai.

PetroChina's Choir Group, which has dozens of our employees as the members, made their debut performance in Halal Bihalal event in the Ministry of Energy and Mineral Resources's office in July 2017. The Choir Group performed one Bimbo's song "Tuhan" and three folk songs "Yamko Rambe Yamko", "Rek Ayo Rek", and "Si Jali-jali" in front of Minister Ignasius Jonan, Vice Minister Archandra Tahar, other ministry officials and PSCs community. The group, comprised of 27 employees, received good applause from the audience despite having only two days to rehearse. On July 18, the full lineup of group of more than 50 employees had their debut performance in the Town Hall Meeting 2017.

The gathering was attended by around 500 employees of PetroChina in Jakarta Office and representatives from various fields. The group performed "One Company One Dream" and three traditional songs. In the following day, they performed in PetroChina's Cocktail Party, attended by Vice Minister Archandra Tahar and other big names in oil and gas industry in Indonesia.

Ms. Lena Ika, a member, said that practising various songs were not easy amid the everyday workloads, but she was glad to be part of the group. "It is good that now we know more traditional songs and could perform in various events," she said. The choir group's members were also nice people to hang out with, said Ms. Rosmalia.

"I hope this group will exist and have regular practice sessions so we will keep improving in the future," she added. Another member Ms. Vianney shared the same idea with her. "I hope if we are committed (to improve the performance), we will be more well known," she said.

The Choir's coordinator Mr. Herman Usman said that continuity was indeed the key. "It's a good group that carries positive image of the company. We must intensify the practice sessions so everyone will be ready to perform in various events inside and outside PetroChina," he said.

Culture

Traditional Dance from Jambi Province

Words by Anggi Mahindrasari | Photo courtesy of Communication Department

Diversities have become the epitome of Indonesian culture. People from various backgrounds and region embrace their own local culture, including Jambi people in Sumatra Island. Most of Jambi's cultures can be traced back to Malay tradition, including songs and dances.

Sekapur Sirih is a dance performed by a group of performers to welcome honorable guests in their community. This welcoming ritual is also popular in other provinces with thick influence of Malay culture such as Bengkulu and Riau. The dance is aimed at showcasing the local's hospitality and openness toward outsiders.

Sekapur Sirih dance is mostly performed by nine female dancers, two male dancers, and another male performer who carries umbrella. The dancers are adorned in baju kurung traditional costume and a gold-colored head pieces. The dance moves are mostly slow and delicate as a gesture of friendly Jambi people. While dancing, the performers carry a cerano or a jar containing betel leaves, which will be

presented to the guests as a welcome present.

Malay-influenced music with various instruments such as violin, harp, accordion, tambourine, and gendang or traditional drum accompanies the dance. The slow-motion dance and great music represent the humble heart of the local people when welcoming the guests with respect and good impression.

In Jambi City, there are two monuments portraying Sekapur Sirih dancers. One is found near the airport, which is seen as a symbol of welcoming the travelers, and another is found in the city center.
